

Osama Ahmed Farouk

DevOps Engineer

+201000748445 osama.faroukk97@gmail.com Giza, Sheikh Zayed osamafaroukk OsamaFarouk

PROFILE

Certified DevOps Engineer (CKA, AWS SAA-C03) with a proven track record of designing scalable cloud infrastructure and managing Kubernetes clusters. Adept at optimizing CI/CD pipelines (GitLab, Jenkins) and automating deployments to enhance system reliability in high-stakes enterprise environments, including the banking and telecommunications sectors. Passionate about leveraging Infrastructure as Code (Terraform) and modern monitoring tools to drive continuous improvement.

EXPERIENCE

DevOps Engineer, Progressoft Boubyan Bank in Kuwait Project - Managed enterprise-scale GitLab CI/CD pipelines and Kubernetes deployments for Boubyan Bank across local and UAT environments, significantly improving deployment reliability. - Executed critical testing and upgrades for the PayHub platform (ACH and DMS), ensuring seamless system performance and full regulatory compliance with the Central Bank of Kuwait.	May 2025 – Present Kuwait City, Kuwait
DevOps Engineer, qeema STC Saudi Arabia Project - Designed and implemented Jenkins CI/CD pipelines to automate the deployment of internal enterprise applications onto a local Kubernetes cluster. - Established comprehensive infrastructure and API observability across all local servers using Prometheus and Grafana, configuring automated Slack alerts to accelerate incident response. - Acted as a Team Lead, establishing standardized weekly reporting workflows for management and spearheading the creation of comprehensive technical documentation to streamline onboarding.	Jun 2024 – Jun 2025 Cairo, Egypt
System Administration / DevOps Track, Information Technology Institute (ITI) - Internship - Architected and deployed a CI/CD multibranch pipeline utilizing Jenkins, Docker, and Kubernetes to fully automate the build, test, and deployment lifecycle of web applications. - Provisioned and managed enterprise infrastructure by writing Terraform (IaC), configuring Red Hat Linux environments, and automating administrative workflows through Bash and Python scripting.	Nov 2023 – Mar 2024 Cairo, Egypt
AWS Cloud Computing Track, ALX Africa Multinational Scholarship - Internship - Designed and deployed a Highly Available (HA) cloud architecture on AWS, leveraging Application Load Balancers (ALB) and Auto Scaling Groups (ASG) to ensure secure traffic distribution and strict fault tolerance. Applied exceptional communication, teamwork, and leadership skills. - Implemented scalable storage and database layers using Amazon S3 and DynamoDB, aligning with modern cloud best practices for building decoupled and microservice architectures.	May 2023 – Feb 2024 Cairo, Egypt
Shift Leader/Incident Manager, Huawei MTN South Africa Project - Directed incident resolution and ensured strict SLA compliance for the MTN network, leveraging the U2020 tool to monitor live traffic and analyze real-time network KPI graphs. Led shift operations and trained team members on advanced monitoring workflows, generating critical performance reports and driving faster incident response times.	Mar 2023 – Jun 2023 Cairo, Egypt
Front Office Engineer, Huawei MTN South Africa Project Maintained highly available telecommunications infrastructure by utilizing OWS and U2020 to proactively triage and resolve critical network alarms (including power and site outages), significantly minimizing service disruptions.	Aug 2021 – Feb 2023 Cairo, Egypt

SKILLS

- Cloud & Virtualization:** AWS | Microsoft Azure | VMware vSphere | Linux (Red Hat) | Windows Server Administration
- Containerization & CI/CD:** Docker | Kubernetes | Helm | Jenkins | GitLab | GitHub | Git | SonarQube (Code Quality)
- IaC & Scripting:** Terraform | Ansible | Bash/Shell | Python | OOP
- Monitoring & Databases:** Prometheus | Grafana | ELK Stack | SQL
- Networking & Web Servers:** Cisco Networking | Apache | Nginx | NOC Management | Network Security

CERTIFICATES

AWS Certified Solutions Architect - Associate (SAA-C03) [↗](#)

Red Hat Certified System Administrator (RHCSA) [↗](#)

Certified Kubernetes Administrator (CKA) [↗](#)

AWS Certified Cloud Practitioner (CLF-C01) [↗](#)

HCIA – Datacom, Huawei Certified [↗](#)

Routing and Switching

EDUCATION

Bachelor of Communication Engineering,

2015 – 2020

Delta University for Science and Technology - Faculty of Engineering

• **Graduation Project:** "Development of 3D Printers Using IoT" (Awarded Excellent / A+ Grade)

COURSES

Certified Kubernetes Administrator (CKA), KodeKloud

2025

Ultimate Elasticsearch 8, Kibana, Logstash, Beats: ELK Stack [↗](#), Udemy

2024

VMware vSphere: Install, Configure, Manage [↗](#), VMware IT Academy

2024

VMware vSphere: Operate, Scale and Secure [↗](#), VMware IT Academy

2024

Red Hat System Administration I,II [↗](#), Red Hat Academy

2024

Huawei Certified Specialist Associate IP Network, Transmission&Access Sales [↗](#), Huawei

2023

Huawei Certified Specialist Associate Storage [↗](#), Huawei

2023

Database Fundamentals [↗](#), Mahara-Tech

2023

Git/GitHub [↗](#), Codecademy

2023

Flutter and Dart Development [↗](#), Udemy

2021

HCIA - 5G [↗](#), Huawei

2021

SQL [↗](#), Codecademy

2020

Python [↗](#), University of Michigan - USA

2020

Android Development [↗](#), New Horizons

2018

Java [↗](#), Syscoms ITI - UAE

2017

AWARDS

First Place Award, Electronics and Embedded Systems, International Japan Africa Conference

2019

(JAC-ECC) - Egypt-Japan University of Science and Technology

Awarded 1st place among international competitors for the innovative engineering and design of an IoT-based 3D printer graduation project.

VOLUNTEERING WORK

Google Developers Group (GDG) Delta, Team Member

2023 – present

Actively engage in technical community events, meetups, and collaborative projects to share knowledge on modern development trends and cloud technologies.
